

Mushroom Identification and Foraging

Join Tom Nagy of River City Mushrooms as he introduces you to the world of foraging for wild edible and medicinal mushrooms in Manitoba! During this program, you will learn the basic skills to confidently identify species of fungi that can be found growing in a variety of habitats throughout the province. Many common and beginner-friendly mushroom species will be discussed in detail, including in which season they appear, as well as ideas for how to cook and preserve your harvest.

Hybrid event. This program will be presented in English. A copy of the presentation material will be provided to participants.

St. Boniface Library / Online
Monday, May 11:
6-7:30 p.m.

Free. To register phone, visit a branch, scan the QR code, or visit winnipeg.ca/library

Tom Nagy is a restoration ecologist with a passion for botany and mycology, and has experience working as a field botanist, market gardener, and environmental consultant.
