

Radon Screening Kit Lending Program

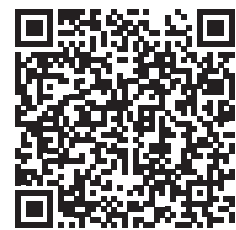

Radon Screening kits are now available to borrow from your local Winnipeg Public Library branch for a three-week loan. Kits are available to borrow between November 1 and April 30 each year. Limited, Visitor, and Temporary Online cards are not eligible.

Radon screening kits include:

- An electronic radon monitor
- An information booklet provided by the Manitoba Lung Association

Radon is a radioactive gas found naturally in the environment. It is also the second leading cause of lung cancer, after smoking. Radon also has no colour, odour, or taste. The only way to know if your home has radon is to test for it.

Health Canada recommends that every home should be tested, no matter where it is located, the type of building, or if it already has a mitigation system.

Free. For more information, scan the QR code, phone, visit, or go online at winnipeg.ca/library
