

What Is Radon? And Why Should I Care?

Radon is a naturally occurring radioactive gas. You can't see, smell, or taste radon, but it is present in almost all indoor environments including homes, schools, and workplaces. Join us online as speakers from Health Canada, the Canadian Association of Radon Scientists and Technologists, and library staff share information about this lung cancer risk and the new Radon Screening Kit lending program at Winnipeg Public Library.

Online event

November 21, 2025
12-1 p.m.

A Zoom link to attend will be sent when you register.

Free. To register, scan the QR code, phone, visit, or go online at winnipeg.ca/library
